

AdvalCT, a.s.

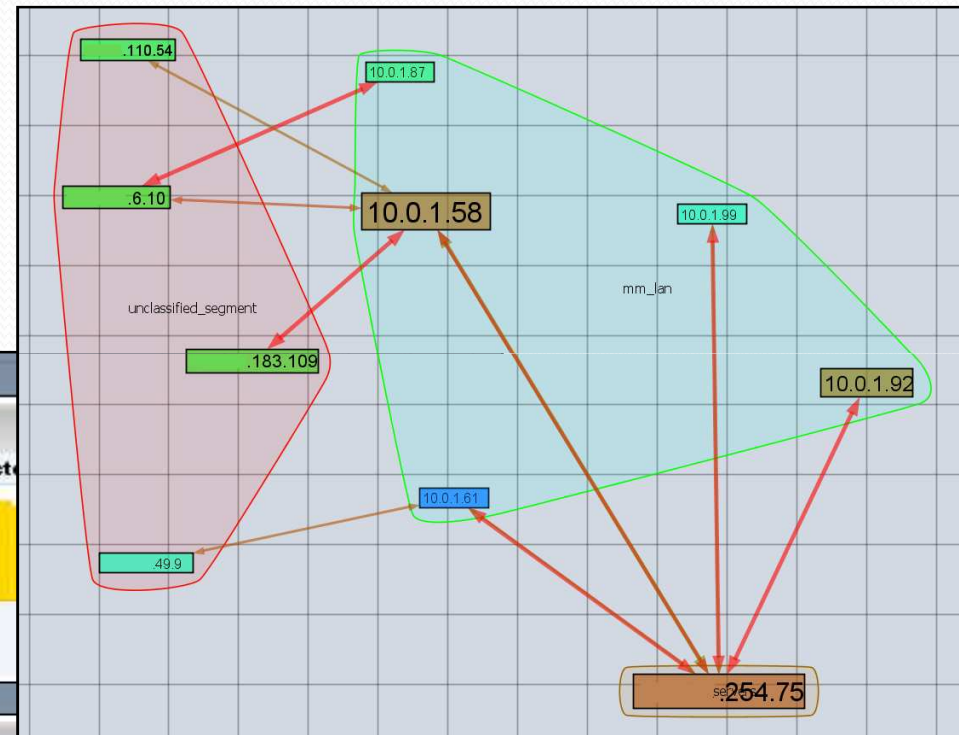

- Insight into networks
- Company developing applications in domain of network monitoring and security
- Inspired by Visual Analytics
- Cooperation with
 - Masaryk University
 - Mycroft Mind, a.s.
 - INVEA-TECH, a.s.

Applications

- MyNetScope
 - Platform for network traffic processing, analysis and visualization
 - Advanced traffic processing (e.g. bidirectional flows)
 - Behavior patterns detection (e.g. SSH dictionary attack)
 - AdvaICT flagship
- MyNetScope-Security
 - Provides an insight in perspective of security managers
 - Build upon MyNetScope platform

MyNetScope

A dashboard with six panels. Top-left: "Behavior Profile Expected" pie chart showing a large orange slice for "Client" and a small yellow slice for "Server". Top-right: "Time Profile Expected" bar chart showing "Transferred GB" over "Time" (0-15). Bottom-left: "Behavior Profile Real" pie chart showing a large yellow slice for "Server" and a small pink slice for "Client". Bottom-middle: "Time Profile Real" bar chart showing "Transferred GB" over "Time" (0-20). Bottom-right: "Communication Structure" diagram showing a force-directed layout with nodes for "Database", "Mail", "Other", and "Web".

Proposal

- We are looking for partners to finish proposed applications into commercial products
- We are looking for partners to integrate our network traffic processing methods into their products
- We are open to collaboration on new applications in various domains
